

About this Document

This document correlates MAP® sub-goals and RIT ranges to Khan Academy® exercises. The Khan exercises are interactive problems for students with instant feedback:

Geometry

RIT Range: 192 - 203

[Categorize quadrilaterals](#)

Categorize quadrilaterals Get 5 correct in a row ✓✓✓✓✓

Which of these shapes are quadrilaterals but not squares?

Select all that apply.

Answer

Select all the correct answers

Check Answer

Khan Academy exercises teach through interactive problems

Having these exercises correlated to RIT ranges means you can use them in conjunction with your flexible student groupings that are also informed by RIT score results. The exercises are also useful for targeting learning in each student's zone of proximal development (Vygotsky).

The correlation between MAP RIT scores and the Khan Academy exercises was determined by using our 2011 norms data to approximate grade levels, which were then matched to the corresponding Common Core State Standards (CCSS). Teachers in states that have not adopted the CCSS may still find these resources valuable by relating goals or sub-goals that are similar to CCSS goals and sub-goals.

NWEA plans to work with Khan Academy to update these links twice a year as new exercises are developed.

How to Use

1. Use MAP reports to find the RIT scores for a given sub-goal.
2. In this document, locate that same goal, approximate RIT range, and sub-goals.
3. To choose appropriate Khan Academy exercises:
 - a. Consider both the name of the exercise and the CCSS standard.
 - b. Click the link and try the exercise yourself.
Note: When you're in Khan Academy, the links to videos and other resources add context to the actual exercise but are not necessarily correlated to MAP.
4. In the browser window where the exercise opened, note or copy the Web address URL.
5. Optionally deliver exercises to students. For example:
 - Paste the URL into an online document for students to access.
 - Present the exercise in the classroom.
 - Use for parent-teacher conference discussion.

Limitations

The instructional suggestions presented in this document are intended to provide supplementary resources based on available Khan Academy exercises and are not intended to replace other options. MAP/MPG data should be used as one of many data points for instructional decisions rather than as a placement guide.

RIT Range: > 231

Solve word problems by modeling real-world (and not-so-real) situations as right triangles and using trigonometry.	HSG-SRT.C.8
Use the triangle congruence criteria SSS, SAS, ASA, and AAS to determine that two triangles are congruent.	HSG-CO.C.10 HSG-CO.C.11 HSG-CO.C.9
Given two triangles, determine whether they are congruent and use that to find missing angle measures.	HSG-CO.C.10
Map a given shape to another one using rigid transformations and dilations. Determine whether the shapes are congruent.	HSG-CO.B.6
Find both the center and the scale factor of a dilation that maps a given figure to another one.	HSG-SRT.A.1
Given two figures on the coordinate plane, find the formal definition of the reflection that takes one figure to another.	HSG-CO.A.2 HSG-CO.A.5
Given a figure on the coordinate plane and a center of a rotation, find the angle for the rotation that maps one figure to the other.	HSG-CO.A.2 HSG-CO.A.5
Given two polygons, try to map one onto the other using angle-preserving transformations, and determine whether they are similar. Transformations are done in "formal mode."	HSG-SRT.A.2
Given two figures on the coordinate plane, find the formal definition of the translation that takes one figure to another.	HSG-CO.A.2 HSG-CO.A.5
Given a figure and a definition of a dilation, manually draw the image.	HSG-SRT.A.1
Given two polygons, try to map one onto the other using angle-preserving transformations, and determine whether they are similar. Transformations are done in "intuitive mode."	8.G.A.4 HSG-SRT.A.2
Given a pair of figures in the coordinate plane, try to map one onto the other and determine whether they are congruent.	8.G.A.2 HSG-CO.B.6
Find missing angles in isosceles triangles given just one angle.	HSG-CO.C.10
Geometric definitions	HSG-CO.A.1
Explore different ways of proving some theorems about lines and angles. Some transformations are used.	HSG-CO.C.9
Use the interactive transformation tool to perform dilations.	HSG-SRT.A.1
Use the interactive transformation tool to perform reflections.	8.G.A.1 8.G.A.3 HSG-CO.A.2 HSG-CO.A.5
Use the interactive transformation tool to perform rotations.	8.G.A.1 8.G.A.3 HSG-CO.A.2 HSG-CO.A.5
Use the interactive transformation tool to perform translations.	8.G.A.1 8.G.A.3 HSG-CO.A.2 HSG-CO.A.5
Use your knowledge of 30-60-90 and 45-45-90 triangles to solve some problems.	HSG-SRT.C.8
Given a description of the effect of a transformation, determine which rigid transformation it is.	HSG-CO.A.2 HSG-CO.A.4
Understand the right triangle definition of sec, csc, and cot ratios.	HSG-SRT.C.6

Geometry

Congruence, Similarity, Right Triangles, & Trig

Standards Alignment

RIT Range: > 231

Given a figure and a definition of a reflection, manually draw the image.	HSG-CO.A.5
Find the reflection that maps a given figure to another and draw the image of a reflection. The lines of reflection in this exercise have a wide range of slopes.	HSG-CO.A.5
Given a figure on the coordinate plane and the definition of a rotation about the origin, manually draw the image of that rotation.	HSG-CO.A.5
Given a figure on the coordinate plane and the definition of a rotation about an arbitrary point, manually draw the image of that rotation.	HSG-CO.A.5
Given two triangles with some of their angle measures, determine whether the triangles are similar or not.	HSG-SRT.A.2 HSG-SRT.A.3
Given two triangles with some of their side measures, determine whether the triangles are similar or not.	HSG-SRT.A.2 HSG-SRT.A.3
Given two similar triangles and some of their side lengths, find a missing side length.	HSG-SRT.B.5
Given two similar triangles and some of their side lengths, find a missing side length.	HSG-SRT.B.5
Solve geometry problems with various polygons by using all you know about similarity and congruence.	HSG-SRT.B.5
Analyze various shapes according to their reflective and rotational symmetries.	HSG-CO.A.3
Given a figure and a definition of a translation, manually draw the image.	HSG-CO.A.5
Find missing angle measures in triangles using the properties of general triangles, isosceles triangles, and equilateral triangles.	HSG-CO.C.10
DEPRECATED Trigonometry 0.5	HSG-SRT.C.6
Given the side lengths of a right triangle, find the sine, cosine, or tangent of one of the acute angles.	HSG-SRT.C.6
DEPRECATED Trigonometry 1.5	HSG-SRT.C.6
Given one side length and an acute angle in a right triangle, find another side using trigonometry.	HSG-SRT.C.6

Geometry

[Compare the areas and perimeters of rectangles when given a context or picture.](#) 3.MD.D.8

[Practice estimating the mass of real life objects using grams and kilograms.](#) 3.MD.A.2

[Practice estimating the volume of real life objects using milliliters and liters.](#) 3.MD.A.2

[Find a missing side length for a figure when given the perimeter.](#) 3.MD.D.8

[Practice finding the area of rectangles by counting unit square. Create rectangles with a given area by covering unit squares.](#) 3.MD.C.6

[Solve word problems involving mass. Estimate the mass of items.](#) 3.MD.A.2

[Practice measuring side lengths to find perimeter.](#) 3.MD.D.8

[Count unit squares and partial unit squares to find the area of shapes.](#) 3.MD.C.6

[Calculate the perimeter of a shape from its side lengths.](#) 3.MD.D.8

Geometry

Geometric Measurement and Relationships

Standards Alignment

RIT Range: 192-202

Find perimeter of figures when given an image or context.	3.MD.D.8
Practice solving real world word problems involving perimeter.	3.MD.D.8
Compare the amount of unit squares that cover figures.	3.MD.C.5
Solve word problems involving volume. Estimate the volume of items.	3.MD.A.2

RIT Range: 203-212

Determine if an angle is acute, right, or obtuse. A protractor is provided.	4.G.A.1
Find the area of rectangles and squares when given side lengths. Find the side length of a square when given the area.	4.MD.A.3
Find the missing side length of a rectangle when given its perimeter or area. Compare perimeters and areas of rectangles.	4.MD.A.3
Find the area of rectangles and squares when given side lengths. Find the side length of a square when given the area.	4.MD.A.3
Estimate the size of angles when given a picture or a situation.	4.MD.C.5
Classify shapes based on pictures or attributes, such as angle types and side-lengths.	4.G.A.2
Practice converting a US customary measure of volume to a smaller unit.	4.MD.A.1
Practice converting a metric measure of mass to a smaller unit.	4.MD.A.1
Practice converting a US customary measure of length to a smaller unit.	4.MD.A.1
Practice converting a metric measure of volume to a smaller unit.	4.MD.A.1
Practice converting a metric measure of length to a smaller unit.	4.MD.A.1
Practice converting a US customary measure of mass to a smaller unit.	4.MD.A.1
Find an angle's measure when given the measures of its parts.	4.MD.C.7
Use a protractor to construct angles.	4.MD.C.6
Draw rays, lines, and line segments with given points.	4.G.A.1
Practice drawing parallel and perpendicular lines, line segments, and ray.	4.G.A.1
Create an acute, right, or obtuse angle using a given vertex.	4.G.A.1
Practice estimating the length of real life objects using US customary units.	4.MD.A.1
Practice estimating the length of real life objects using metric units.	4.MD.A.1
Practice estimating the mass of real life objects using US customary units.	4.MD.A.1
Practice estimating the volume of real life objects using US customary	4.MD.A.1
Practice identifying triangles by their angles as acute, right, or obtuse.	4.G.A.2

Geometry

Geometric Measurement and Relationships

Standards Alignment

RIT Range: 203-212

Practice converting a measure of time to a smaller unit.	4.MD.A.1
Measure angles using a protractor.	4.MD.C.6
Solve word problems that involve converting between U.S. dollars and cents and converting U.S. dollars to other units of money, like pesos.	4.MD.A.2
Solve word problems to find what time an event occurred or how long an event lasted.	4.MD.A.2
Name angles by their vertex, endpoints, or labels.	4.MD.C.5
Identify quadrilaterals based on pictures or attributes. Quadrilaterals included are parallelograms, rhombuses, rectangles, and squares.	4.G.A.2
Determine if angles in shapes and pictures are acute, right, or obtuse.	4.G.A.1
Recognize rays, lines, and line segments in geometric figures.	4.G.A.1
Determine if angles in shapes and pictures are acute, right, or obtuse.	4.G.A.1
Recognize parallel and perpendicular lines in geometric figures and pictures.	4.G.A.1
Practice identifying triangles by their side-lengths as equilateral, isosceles, or scalene.	4.G.A.2
Practice estimating the length of an event using seconds, minutes, and hours.	4.MD.A.1

RIT Range: 213 - 220

Converting measurements word problems	5.MD.A.1
Converting units	5.MD.A.1

RIT Range: 213-219

Decompose figures to find volume	5.MD.C.5 5.MD.C.5c
Volume 1	5.MD.C.5 5.MD.C.5b
Volume word problems	5.MD.C.5 5.MD.C.5b 5.MD.C.5c
Volume with unit cubes 1	5.MD.C.4 5.MD.C.5
Volume formula intuition	5.MD.C.5

RIT Range: 213-219

Find the distance between points, graph points, and interpret data on coordinate planes to solve word problems.	5.G.A.2
Graph and find the distance between point in first quadrant of coordinate plane.	5.G.A.2

RIT Range: > 231

Write the equation for a line that is a parallel or perpendicular to a line given in slope-intercept form and goes through a specific point.

HSG-GPE.B.5

Operations and Algebraic Thinking

Expressions and Equations

Standards Alignment

RIT Range: < 160

Practice adding by "putting together" (with numbers less than 10).

K.OA.A.1

Practice subtracting by "taking apart" (with numbers less than 10).

K.OA.A.1

RIT Range: 161-178

Practice adding 3 numbers. All numbers in these problems are 20 or less.

1.OA.A.2

Practice adding and subtracting to solve word problems. Numbers used are 20 or less.

1.OA.A.1

Practice solving more challenging word problems with addition and subtraction. Numbers used are 20 or less.

1.OA.A.1

Practice solving word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Practice solving more word problems by finding how many more (or fewer) objects there are. Numbers used are 20 or less.

1.OA.A.1

Learn how to solve problems like " $____ - 7 = 18$ " where you don't know one of the values in an addition or subtraction equation.

1.OA.D.8

Practice seeing how addition and subtraction are related.

1.OA.B.4

RIT Range: 179-191

Practice adding and subtracting to solve word problems. These questions are result unknown or change unknown problems. Numbers used are 100 or less.

2.OA.A.1

Practice solving word problems with addition and subtraction. These questions are comparison problems including difference unknown, smaller value unknown, and bigger value unknown. Numbers used are 100 or less.

2.OA.A.1

Practice solving word problems with addition and subtraction. These questions are start unknown problems including add to and take from problems. Numbers used are 100 or less.

2.OA.A.1

Practice solving more challenging addition and subtraction word problems 2.OA.A.1

with "more" and "fewer". Multi-step problems are also included.

Numbers used are 100 or less.

Practice solving problems like " $\underline{\quad} - 45 = 27$ " where you have to figure out 2.OA.A.1

the missing value in an addition or subtraction equation.

<u>Add and subtract lengths to solve word problems.</u>	2.OA.A.1
<u>Practice adding 2-digit numbers like $43+27$ that have sums that are multiples of 10.</u>	2.NBT.B.5
<u>Practice adding two-digit numbers by making groups of ten.</u>	2.NBT.B.5
<u>Read and interpret picture graphs.</u>	2.OA.A.1

RIT Range: 192-202

<u>Addition using groups of 10 and 100</u>	3.NBT.A.2
--	-----------

RIT Range: 192-202

<u>Practice changing the grouping of factors in multiplication problems and see how it affects the product.</u>	3.OA.B.5
<u>Practice changing the order of factors in a multiplication problem and see how it affects the product.</u>	3.OA.B.5
<u>Divide two numbers. Quotients are equal to or less than 10.</u>	3.OA.A.4
<u>Practice solving for unknown letters and symbols in equations.</u>	3.OA.B.6
<u>See the relationship between multiplication and division problems.</u>	3.OA.B.6
<u>Find both the multiplication and division equation that can be used to solve a word problem.</u>	3.OA.B.6
<u>Solve two-step word problems with addition, subtraction, multiplication, and division. Some questions include estimation.</u>	3.OA.D.8

RIT Range: 204 - 212

<u>Comparing with multiplication</u>	4.OA.A.1
--------------------------------------	----------

RIT Range: 203-212

<u>Practice solving multiplication and division word problems. Some problems have remainders.</u>	4.OA.A.2
<u>Multiply 2- or 3-digit numbers by 1-digit numbers. No regrouping.</u>	4.NBT.B.5
<u>Multiply 3- or 4-digit numbers by 1-digit numbers. Regrouping (carrying) needed.</u>	4.NBT.B.5
<u>Multiply 2-digit numbers by 2-digit numbers. Regrouping (carrying) needed.</u>	4.NBT.B.5
<u>Multiply a 1-digit number by a multi-digit number by decomposing the multi-digit number.</u>	4.NBT.B.5
<u>Use an area model to decompose factors and multiply.</u>	4.NBT.B.5

Operations and Algebraic Thinking

Expressions and Equations

Standards Alignment

RIT Range: 203-212

Use an area model to decompose the larger factor and multiply. 4.NBT.B.5

RIT Range: 213-219

Practice creating expressions with parentheses from real-world contexts. 5.OA.A.2

Solve multi-step expressions with parentheses. Place parentheses in an expression to make the expression equivalent to a given number. 5.OA.A.1

Solve and interpret fraction multiplication word problems. 5.NF.B.6

Practice evaluating powers of ten. 5.NBT.A.2

Practice changing expressions from words to math. 5.OA.A.2

Give the number of tens a number is being multiplied or divided by when the decimal is moved to the left or right. 5.NBT.A.2

RIT Range: 220-223

Simplify algebraic expressions by combining like terms. 6.EE.A.3

Practice expanding expressions using the distributive property then combining like terms. 6.EE.A.3

Practice figuring out if a variable is dependent or independent. 6.EE.C.9

Practice applying the distributive property to algebraic expressions. 6.EE.A.3

Practice writing basic equations to model real-world situations. 6.EE.B.6 | 6.EE.B.7

Practice determining whether or not two algebraic expressions are equivalent by manipulating the expressions. These problems require you to combine like terms and apply the distributive property. 6.EE.A.3

Practice plugging in values to evaluate real-world algebraic expressions. These are introductory problems, so the expressions aren't too complicated. 6.EE.A.2

Practice solving more challenging problems using the order of operations. 6.EE.A.1

Practice spotting the mistake in someone else's work as they attempt to solve one-step equations. 6.EE.B.7

Create number line graphs of inequalities. 6.EE.B.8

Practice writing inequalities with variables to describe real-world situations. 6.EE.B.6 | 6.EE.B.8

[Practice solving equations in one step by multiplying or dividing a value from both sides.](#)

6.EE.B.7 | HSA-REI.B.3

[Practice solving equations in one step by adding or subtracting the same value from both sides.](#)

6.EE.B.7 | HSA-REI.B.3

[Practice solving equations in one step by adding or subtracting a number from both sides. These problems involve decimals and fractions.](#)

6.EE.B.7

Operations and Algebraic Thinking

Expressions and Equations

Standards Alignment

RIT Range: 220-223

Practice solving equations in one step by multiplying or dividing a number from both sides. These problems involve decimals and fractions. 6.EE.B.7

Practice taking exponents of whole numbers. All exponents in these problems are either positive or zero. 6.EE.A.1

Practice evaluating exponents that have fractional bases. 6.EE.A.1

Practice plugging in values to equations and checking to see if the equations hold true. 6.EE.B.5

Practice plugging in values to inequalities and checking to see if the inequalities hold true. 6.EE.B.8

Practice writing algebraic expressions to match verbal descriptions of mathematical operations. 6.EE.A.2

Practice writing slightly more complex algebraic expressions to model real-world situations. 6.EE.A.2

Practice writing basic algebraic expressions to match verbal descriptions of mathematical operations. 6.EE.A.2

Practice writing basic algebraic expressions to model real-world situations. 6.EE.A.2

RIT Range: 224-227

Simplify algebraic expressions by combining like terms. Coefficients on some terms are negative. 7.EE.A.1

Practice combining like terms using the distributive property. These problems involve adding and subtracting negative numbers. 7.EE.A.1

Practice solving word problems involving price discounts, taxes, and tip calculations. 7.EE.B.3

Practice figuring out which expressions are equivalent by applying your knowledge of negative numbers and the distributive property. 7.EE.A.1

Factor expressions like $3x-9$ by applying the distributive property. (All expressions in this exercise are linear binomials.) 7.EE.A.1

Practice interpreting linear expressions 7.EE.A.2

Practice solving equations that take two steps to solve. 7.EE.B.4 | HSA-REI.B.3

Practice writing equations to model real-world situations, then solve the equations to answer interesting questions about the situations. 7.EE.B.4

Practice combining like terms for expressions that have rational coefficients. This requires adding and subtracting fractions. 7.EE.A.1

Practice solving word problems involving price markups and commission fees. 7.EE.B.3

Practice solving multi-step word problems. The numbers in these problems may be fractions, decimals, and percents. 7.EE.B.3

Operations and Algebraic Thinking

Expressions and Equations

Standards Alignment

RIT Range: 224-227

Practice solving equations that take two steps to solve. These problems involve arithmetic with fractions and decimals. 7.EE.B.4

RIT Range: 228-230

Given two numbers in scientific notation, practice adding and subtracting them. 8.EE.A.4

Solve age word problems with a system of equations. 8.EE.C.8

Practice comparing two real-world quantities by approximating them with powers of 10. 8.EE.A.3

A variety of questions about rates and proportional relationships involving graphs, tables, and equations. 8.EE.B.5

Given a linear equation with missing values, determine appropriate values in order to have one, zero, or infinite solutions. 8.EE.C.7

Practice solving more challenging problems involving scientific notation. 8.EE.A.4

Determine the number of solutions of a given system of equations by considering its algebraic solution process. 8.EE.C.8 | HSA-SSE.B.3

Practice finding the cube root of a perfect cube positive integer. 8.EE.A.2

Practice solving equations by squaring or cubing both sides. 8.EE.A.2

Practice evaluating expressions by adding, subtracting, or multiplying exponents. 8.EE.A.1

Practice computing numbers raised to positive and negative exponents. Bases may be fractions. 8.EE.A.1

Find the graph of a linear equation given in standard form. 8.EE.C.7 | HSA-REI.D.10

Determine the number of solutions of a given system of equations by considering its graph. 8.EE.C.8 | HSA-REI.D.10 | HSA-REI.D.11

Graph a system of equations in slope-intercept or standard form, and find their solution using the graphs. 8.EE.C.8 | HSA-REI.C.6 | HSA-REI.D.10 | HSA-REI.D.11

Graphing proportional relationships 8.EE.B.5

Given the x or y value of a 2-variable equation solution, find the value for the other variable in the solution. 8.EE.C.7 | HSA-REI.B.3 | HSA-REI.D.10

Practice solving one-variable equations like $20 - 7x = 6x - 6$, where the variable appears on both sides of the equals sign. 8.EE.C.7 | HSA-REI.B.3

[Practice solving problems using your knowledge of square and cube roots.](#) 8.EE.A.2

[Practice expressing products and quotients in scientific notation.](#) 8.EE.A.4

[Practice solving equations with parentheses using the distributive property.](#) 8.EE.C.7 | HSA-REI.B.3

[Solve linear equations that contain expressions with parentheses and the coefficients are rational numbers.](#) 8.EE.C.7 | HSA-REI.B.3

RIT Range: 228-230

Practice solving multiplication and division problems that involve powers of ten.	8.EE.A.3
Practice applying properties of exponents.	8.EE.A.1
Practice taking square roots of decimals and fractions.	8.EE.A.2
Practice expressing numbers in scientific notation.	8.EE.A.4
Practice telling whether an equation has one, zero, or infinite solutions.	8.EE.C.7
Practice finding the square root of a perfect square positive integer.	8.EE.A.2
Solve systems of equations with any number of solutions using any solution method.	8.EE.C.8 HSA-APR.A.1 HSA-REI.C.6 HSA-SSE.B.3
Solve systems of equation with multi-step elimination (e.g., a manipulation is needed in order for x-values or y-values to cancel each other out).	8.EE.C.8 HSA-APR.A.1 HSA-REI.C.6 HSA-SSE.B.3
Solve systems of equation with one-step elimination (e.g., x-values or y-values cancel each other out).	8.EE.C.8 HSA-APR.A.1 HSA-REI.C.6
Solve systems of equations where one of the equations is solved for one of the variables.	8.EE.C.8 HSA-REI.C.6 HSA-SSE.B.3
Determine whether a couple of given systems of equations are equivalent or not to a third given system.	8.EE.C.8 HSA-APR.A.1 HSA-REI.C.5
Solve word problems by modeling them into a system of equations and solving it.	8.EE.C.8 HSA-APR.A.1 HSA-CED.A.2 HSA-CED.A.3 HSA-REI.C.6 HSA-SSE.B.3
Solve linear equations where the variable appears on both sides of the equation and the coefficients are decimals or fractions.	8.EE.C.7 HSA-REI.B.3
Verify whether a given pair of values is a solution to a system of equations.	8.EE.C.8

RIT Range: > 231

Example: Add $(2x^2-3)$ and $(7x^3-4x+1)$.	HSA-APR.A.1
Example: Subtract $(x^2+2xy-y)$ and $(3x+5xy+2y^2)$.	HSA-APR.A.1
Example: Subtract $-2x^2+4x-1$ from $6x^2+3x-9$.	HSA-APR.A.1
Choose which step an error was made in adding or subtracting polynomials.	HSA-APR.A.1
Example: Subtract $a^2-4a^2b^2-2b^2$ from $-3a^2+5a^2b^2+2b^2$	HSA-APR.A.1
Check whether an ordered pair is a solution of a system of two-variable linear inequalities.	HSA-CED.A.3
Given a two-variable linear inequality, check whether a given pair of values	HSA-CED.A.3

is a solution of the inequality.

Given some information about a real-world context, analyze expressions containing unknown variables that model that context.

HSA-SSE.A.1 | HSA-SSE.A.2

Solve quadratic equations of the form x^2+bx+c by completing the square.

HSA-REI.B.4 | HSA-SSE.B.3

Operations and Algebraic Thinking

Expressions and Equations

Standards Alignment

RIT Range: > 231

Solve quadratic equations of the form ax^2+bx+c by completing the square.	HSA-REI.B.4 HSA-SSE.B.3
Practice the method of completing the square with quadratic expressions.	HSA-REI.B.4
Solve compound linear inequalities.	HSA-REI.B.3
Solve general word problems about real-world relationships that can be modeled by linear equations or functions.	HSA-CED.A.2 HSA-CED.A.4
Determine the number of solutions of a given system of equations by considering its algebraic solution process.	8.EE.C.8 HSA-SSE.B.3
Convert linear equations between slope-intercept and standard forms.	HSA-SSE.B.3
Analyze quadratic equations in order to determine how many different real number solutions they have.	HSA-SSE.B.3
Rewrite expressions of the form $a(x)/b(x)$, where a is a polynomial b is a linear binomial, in the form $q(x)+r(x)/b(x)$, where q and r are polynomials and the degree of r is less than the degree of b.	HSA-APR.D.6
Rewrite expressions of the form $a(x)/b(x)$, where a is a polynomial b is a monomial, in the form $q(x)+r(x)/b(x)$, where q and r are polynomials and the degree of r is less than the degree of b.	HSA-APR.D.6
Rewrite expressions of the form $a(x)/b(x)$, where a and b are polynomials, in the form $q(x)+r(x)/b(x)$, where q and r are polynomials and the degree of r is less than the degree of b.	HSA-APR.D.6
Determine whether pairs of exponential expressions are equivalent.	HSA-SSE.B.3
Given some information about several unknown variables, evaluate an expression containing those variables.	HSA-SSE.A.2
Given some information about several unknown variables, evaluate an expression containing those variables.	HSA-SSE.A.2
Practice some problems that involve thinking about the conditions for obtaining extraneous solutions while solving radical equations.	HSA-REI.A.2
Factor quadratic expressions into the special products of the general forms $(x+a)^2$, $(x-a)^2$, and $(x+a)(x-a)$.	HSA-SSE.A.2
Factor quadratic expressions of the general difference of squares form: $(ax)^2-b^2$. The factored expressions have the general form $(ax+b)(ax-b)$.	HSA-SSE.A.2
Factor "advanced" polynomials (i.e. polynomials of various degrees and or with two variables) using special product factorization methods.	HSA-SSE.A.2 HSA-SSE.B.3
Factor quadratics of the form x^2+bx+c.	HSA-SSE.A.2 HSA-SSE.B.3
Factor polynomials that can be factored as the product of a monomial and a quadratic expression, then further factor the quadratic expression.	HSA-SSE.A.2 HSA-SSE.B.3

Factor quadratics of the form ax^2+bx+c .

HSA-SSE.B.3

Factor "advanced" polynomials (i.e. polynomials of various degrees and or with two variables) using quadratic factorization methods.

RIT Range: 204 - 212

Prime numbers

4.OA.B.4

RIT Range: 203-212

Practice rewriting fractions to have the same denominator.

4.NF.A.2

Practice comparing two fractions with different denominators with greater and less than symbols.

4.NF.A.2

Practice comparing fractions and mixed numbers that have unlike denominators.

4.NF.A.2

Use your place value skills to practice comparing whole numbers.

4.NBT.A.2

Compare multi-digit numbers that challenge your place value understanding

4.NBT.A.2

Sal arranges digits to make the largest or smallest possible number.

4.NBT.A.1

Practice using the same whole to find equivalent fractions.

4.NF.A.2

Practice dividing whole numbers by 10.

4.NBT.A.1

Practice making equivalent fractions by multiplying the numerator and denominator by the same number.

4.NF.A.1

Practice multiplying and dividing whole numbers by ten.

4.NBT.A.1

Practice multiplying whole numbers by 10.

4.NBT.A.1

Practice reading and writing numbers written in expanded form. Example: The expanded form of 376 is $300 + 70 + 6$.

4.NBT.A.2

Practice working with whole numbers in written form. For example, "one thousand four hundred three" is the written form of 1403.

4.NBT.A.2

Practice ordering 3 fractions from least to greatest.

4.NF.A.2

Practice thinking about the value of each digit in a number.

4.NBT.A.2

Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right.

4.NBT.A.1

Practice problems to challenge your understanding of whole number place value

4.NBT.A.2

Practice finding equivalent fractions. These problems show you pictures of fractions to help you out.

4.NF.A.1

Practice comparing fractions by looking at pictures. Fractions in these problems do not have common denominators.

4.NF.A.2

RIT Range: 213-219

Compare 2 numbers to thousandths based on meanings of the digits in each place.

The Real and Complex Number Systems

Extend and Use Properties

Standards Alignment

RIT Range: 220-223

Practice putting positive and negative numbers in order. For example, -28, 12, -51, and 43.

6.NS.C.7

Practice putting positive and negative fractions and decimals in order. For example, $-\frac{12}{4}$, -2.5, and 3.25.

6.NS.C.7

Practice reflecting points across axes on the xy coordinate plane.

6.NS.C.6 | 6.NS.C.8

Practice finding the distance between two points on the coordinate plane that share the same x- or y-coordinate.

6.NS.C.6 | 6.NS.C.8

Practice comparing positive and negative numbers by thinking about their positions on the number line. Numbers to the right are greater than numbers to the left.

6.NS.C.7

Practice writing inequalities to describe real-world situations.

6.NS.C.7

RIT Range: 228-230

Practice using a calculator to find the approximate decimal values of irrational numbers.

8.NS.A.2

Practice comparing irrational numbers without using a calculator.

8.NS.A.2

Practice finding the approximate value of square roots by thinking about perfect squares.

8.NS.A.2

Practice converting 1- and 2-digit repeating decimals to fractions.

8.NS.A.1

Practice converting multi-digit repeating decimals to fractions.

8.NS.A.1

Practice identifying whether numbers are rational or irrational.

8.NS.A.1

Practice finding the approximate value of square roots by thinking about perfect squares.

8.NS.A.2

Practice writing fractions as repeating decimals. Get ready to bust out those long division skills!

8.NS.A.1

RIT Range: > 231

Practice simplifying expressions with multiple radical terms combined by addition, subtraction, multiplication, and/or division.

HSN-RN.A.2

Evaluate numerical expressions with rational exponents, and convert between equivalent forms of exponential and radical expressions.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical exponential expressions and simplify variable exponential expressions by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical expressions and simplify variable expressions with mixed exponential and radical terms, by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Add, subtract, multiply, and divide square roots. For example, simplify $\sqrt{50} - \sqrt{32}$.

HSN-RN.A.2

The Real and Complex Number Systems

Extend and Use Properties

Standards Alignment

RIT Range: > 231

Determine whether an expression that is the combination of two rational/irrational numbers is rational or irrational itself.

HSN-RN.B.3

For example, simplify $\sqrt[3]{18}$ as $3\sqrt[3]{2}$.

HSN-RN.A.2

Evaluate numerical radical expressions and simplify variable radical expressions by using the properties of exponents.

HSN-RN.A.1 | HSN-RN.A.2

Evaluate numerical expressions with unit-fraction exponents or radicals, and convert between the two forms of representations.

HSN-RN.A.1 | HSN-RN.A.2

RIT Range: 231 - 234

Properties of exponents

Multiply tenths like 0.6×0.4	5.NBT.B.7
Multiply decimals and whole numbers like 8×0.2 or 0.56×4	5.NBT.B.7
Multiply numbers with tenths and hundredths like 3.1×3.3 or 1.7×0.12	5.NBT.B.7
Solve and interpret fraction multiplication word problems.	5.NF.B.6
Practice evaluating powers of ten.	5.NBT.A.2
Round decimals and whole numbers to the nearest thousand, hundred, ten, one, tenth, or hundredth.	5.NBT.A.4
Round decimals using number lines. Select numbers that round to a given value.	5.NBT.A.4
Practice using a number line to round decimal numbers.	5.NBT.A.4

The Real and Complex Number Systems

Perform Operations

Standards Alignment

RIT Range: 213-219

Complete subtraction problems where both numbers are written to the hundredths place. 5.NBT.B.7

Complete subtraction problems where both numbers are written to the tenths place. 5.NBT.B.7

Practice subtracting fractions that have different denominators. 5.NF.A.1

Subtract tenths like 0.9-0.7 5.NBT.B.7

Subtract small whole numbers and tenths like 1.6-0.3 5.NBT.B.7

Subtract larger whole numbers and tenths like 78.4-3 5.NBT.B.7

Subtract trickier numbers with tenths like 56.8-17.9 5.NBT.B.7

Subtract hundredths like 0.75-0.56 5.NBT.B.7

Subtract small whole numbers, tenths, and hundredths like 0.6-0.43 or 1.58-0.5 5.NBT.B.7

Subtract larger whole numbers, tenths, and hundredths like 67.89-6 or 35.65-17.34 5.NBT.B.7

More challenging subtraction problems with whole numbers, tenths, and hundredths like 15-7.45 or 12.19-7.68 5.NBT.B.7

Give the number of tens a number is being multiplied or divided by when the decimal is moved to the left or right. 5.NBT.A.2

Practice understanding that the fraction bar really means division. 5.NF.B.3

Practice word problems that involve using the fraction bar as division. 5.NF.B.3

Use area models, number lines, and tape diagrams to multiply a whole number times a fraction. 5.NF.B.4

Use area models and tape diagrams to multiply a fraction times a fraction. 5.NF.B.4

Practice adding and subtracting fractions that have different denominators. Problems have fraction diagrams. 5.NF.A.1

RIT Range: 220-223

Practice solving word problems by adding or subtracting decimal numbers. 6.NS.B.3

Practice adding two numbers that are written to the tenths, hundredths, or thousandths place. 6.NS.B.3

Practice applying the distributive property to factor numerical expressions (no variables). 6.NS.B.4

[Practice dividing decimal numbers using "long division".](#)

6.NS.B.3

[Practice dividing fractions by fractions. No negative numbers are used in this exercise.](#)

6.NS.A.1

[Practice solving word problems by dividing fractions by fractions.](#)

6.NS.A.1

The Real and Complex Number Systems

Perform Operations

Standards Alignment

RIT Range: 220-223

Practice dividing multi-digit whole numbers. These problems use remainders. 6.NS.B.2

Solve word problems where you either need to find the GCF or LCM. 6.NS.B.4

Find the greatest common factor of 2 or 3 integers. 6.NS.B.4

Find the lcm (least common multiple) of pairs of integers. 6.NS.B.4

Practice multiplying two numbers that are written to the tenths, hundredths, or thousandths place. 6.NS.B.3

Practice subtracting two numbers that are written to the tenths, hundredths, or thousandths place. 6.NS.B.3

Understanding dividing fractions by fractions 6.NS.A.1

RIT Range: 224-227

Practice adding and subtracting positive and negative fractions. 7.NS.A.1

Practice subtracting positive and negative single-digit numbers. 7.NS.A.1

Practice adding positive and negative single-digit numbers. 7.NS.A.1

Practice solving word problems with negative numbers. 7.NS.A.1

Practice comparing decimals, percents, fractions, and mixed numbers. 7.NS.A.2

Practice simplifying complex fractions. 7.NS.A.3

Practice converting a fraction to a decimal. 7.NS.A.2

Practice dividing mixed numbers. Numbers in these problems may be positive or negative. 7.NS.A.2

Practice raising positive and negative numbers (integers only) to whole number powers. Watch out for mischievous negative signs that aren't really part of the base! 7.NS.A.2

Practice raising fractions to whole number powers. Fractions in these problems may be positive or negative. 7.NS.A.2

Practice classifying numbers as whole, integer, rational, and irrational. 7.NS.A.3

Practice finding the missing value in an addition or subtraction equation involving negative numbers. 7.NS.A.1

Practice solving addition and subtraction problems with negative numbers. 7.NS.A.1

Practice plugging in values to evaluate negative number addition and subtraction expressions. 7.NS.A.1

Practice multiplying and dividing integers. 7.NS.A.2

Practice writing addition and subtraction equations to match number line diagrams. 7.NS.A.1

The Real and Complex Number Systems

Perform Operations

Standards Alignment

RIT Range: 224-227

[Practice identifying equivalent expressions involving the addition and subtraction of negative numbers.](#)

7.NS.A.1

[Practice matching addition and subtraction equations to real-world scenarios.](#)

7.NS.A.1

[Practice matching situations to multiplication and division expressions and equations.](#)

7.NS.A.2

[Practice evaluating expressions using the order of operations. Numbers used in these problems may be negative.](#)

7.NS.A.2

[Practice determining whether the sum of two numbers is positive, negative, or zero.](#)

7.NS.A.1

[Practice working through addition and subtraction problems using the number line.](#)

7.NS.A.1

[Practice solving challenging negative number addition and subtraction problems. Number line models, variables, and absolute value come together to push your knowledge of negative numbers even deeper \(maybe even below zero!\).](#)

7.NS.A.1

RIT Range: > 231

[Practice addition and subtraction with complex numbers.](#)

HSN-CN.A.2

[Simplify expressions with base \$i\$ \(the imaginary unit\) raised to a positive exponent.](#)

HSN-CN.A.1 | HSN-CN.A.2

[Multiply complex numbers by single terms that are either real or pure imaginary.](#)

HSN-CN.A.2

[Given two complex numbers, find their product.](#)

HSN-CN.A.2

[Determine the real and the imaginary parts of complex numbers](#)

HSN-CN.A.1

[Rewrite square roots of negative numbers as imaginary numbers.](#)

HSN-CN.A.1

[Classify numbers as real, pure imaginary, or complex.](#)

HSN-CN.A.1

[Determine the appropriate unit of a quantity based on a formula containing that quantity.](#)
